

The **right VoIP platform** is one that is easily customized, reacts quickly to market shifts, & generates higher profits for your company

### THE TALKING PLANET SUITE OF SERVICES

The Intelliverse Talking Planet Suite takes advantage of VoIP technology to provide all the familiarity and calling features of local telephone service plus the ground-breaking innovation of next-generation communications services.

This solution includes a complete suite of customizable VoIP and messaging features, differentiating you from the competition and driving higher profitability.

### CUSTOMIZING YOUR VOIP SERVICE STARTS HERE

As an Intelliverse partner, you have the power to create a fully customized service plan. Our Plan Wizard and Configuration Tool can implement optimal features and revenue opportunities just for your company. And when shifts occur due to technology changes or consumer demands, your service won't just keep up — it will stay ahead. One reason we can offer extensive customization and fast reaction times: we own the intellectual property to our platform. Our end-to-end VoIP solution was developed inhouse, and our flexible architecture and tools are designed to accommodate a range of business needs. This flexibility simplifies the entire process and keeps costs lower, accelerating your time to market and maintaining your competitive edge. You know your business and your customers better than anyone. Together, we can create the perfect, customized service plans for your brand that no one else can offer.

We're ready to discuss how our **Talking Planet** can impact your organization's bottom line.
